EDUCATION

Sphoorthy Engineering College

Bachelor of Technology in Computer Science, (AI & ML) — CGPA: 8.28/10

Hyderabad

Nov 2022 – June 2026

TECHNICAL EXPERIENCE

LawMate – AI-Powered Legal Intelligence Platform

Ongoing

Python, LLMs, Retrieval-Augmented Generation (RAG), NLP

- Developing a hybrid AI system combining LLMs and RAG pipelines for context-aware and explainable legal assistance.
- Building retrieval, preprocessing, and response-generation workflows for grounded AI outputs.
- Documenting model behavior, system design, and evaluation findings.

Real-Time Facial Detection System

June - July 2025

Python, OpenCV, PyTorch

- Developed a computer vision pipeline for real-time face detection and classification.
- Focused on model inference, debugging, and performance improvement.
- Demonstrated applied understanding of AI inference system design.

Transformer-Based NLP System (Sarcasm Detection)

Mar - April 2025

Python, PyTorch, Hugging Face Transformers

- Fine-tuned BERT and RoBERTa models for text classification tasks.
- Implemented data cleaning, tokenization, model training, and evaluation pipelines.
- Performed iterative testing and error analysis to improve model performance.

Predictive Analytics & Data Pipeline Project

May 2025

Python, Scikit-learn, XGBoost, Pandas

- Implemented data preprocessing, EDA, and feature engineering for ML models.
- Performed exploratory data analysis to identify trends, patterns, and data quality issues.
- Built and evaluated predictive models to support data-driven decision making.
- Strengthened understanding of data engineering supporting ML systems.

Semantic Plagiarism Detection System

Mar 2025

Python, Sentence-BERT, Scikit-learn

- Built embedding-based similarity models to detect paraphrased text.
- Designed preprocessing workflows for unstructured textual datasets.
- Strengthened understanding of NLP and retrieval-based ML systems.

ACCOMPLISHMENTS

Winner – 36-hrs Hackathon | OxiGen

June 2024

- Conceptualized 'OxiGen', an innovative hardware automating CO2 conversion into breathable oxygen

Winner – Talk2Data Project Expo | Created advanced regression models with R^2 over 0.80.

June 2025

- Achieved 0.80+ R^2 in residential price prediction through automated regression pipelines and advanced model validation.

SKILLS

Programming: Python, SQL, Java

AI & ML: Scikit-learn, PyTorch, Hugging Face, Transformers, RAG, NLP, Computer Vision

Core CS: Data Structures & Algorithms, OOP, Complexity Analysis

Data & Analytics: Pandas, NumPy, Data Cleaning, Preprocessing

Tools: Git, GitHub, VS Code, Docker, AWS

Soft Skills: Analytical Thinking, Willingness to Learn, Adaptability, Attention to Detail, Communication, Independent Problem Solving
